

# UNIVERGE® SV8300 Communications Server

Fulfilling the promise of UNIVERGE®360

Business today demands efficient, seamless communications that help workers make quick decisions and respond to customers quickly and knowledgeably. UNIVERGE®360 is NEC's approach to help businesses succeed in these endeavors by placing people at the center of communications.

The UNIVERGE SV8300 Communications Server, part of UNIVERGE360's Unified Infrastructure, is the ideal system for businesses wishing to compete on a higher level and grow over time. This robust, feature-rich solution is completely scalable and can be expanded to meet your communications needs both now and in the future.

## At a Glance

- Scalability for the growing business
- Support for VoIP and traditional voice
- Enhanced centralized management
- Diverse features that increase productivity
- Seamless networking

### *Scalability for the Growing Business*

The SV8300 functions alone or in a network and can expand to meet all of your business communication needs – including mission-critical data applications.

### *Support for VoIP and Traditional Voice*

You can deploy a pure IP solution or any combination of IP and traditional circuit-switched technology on a single SV8300. This support provides the ability to customize the best communications solution for your business.

### *Enhanced Centralized Management*

The SV8300 offers centralized management of phone system, data system and enterprise platforms. Moves, adds and changes of SV8300 phones are quick and easy. Simply plug any phone into any jack wherever it's needed. It's ready to go!

### *Investment Protection*

Protect your technology investment while providing a migration path to pure IP. The SV8300 has the flexibility to support your existing traditional circuit-switched technology and can be fully utilized to run in a pure IP environment.

### *Diverse Features that Increase Productivity*

The SV8300 streamlines your business communications with its wide range of on-board applications and high-powered features that can be transparently shared between branches or remote locations.

## Diverse Features that Increase Productivity (cont.)

The SV8300 streamlines your business communications with its wide range of on-board applications and high-powered features that can be transparently shared between branches or remote locations.

- NEC's UNIVERGE IP and Digital Terminals (both desktop and wireless DECT) enhance user mobility and help workers to be more productive whether they are at their desks or have stepped away.
- Compatibility with *UC for Business* ensures that a unified approach is used in all of your business communications.
- *UC for Enterprise* integrates multiple applications into one feature rich client - the UC700.
- Windows®-based UNIVERGE SV8000 Series PC Pro provides centralized online HTML-based programming access.
- A Conference Bridge that accommodates up to 32 lines. The SV8300 includes licenses for 8 lines and can accommodate another 24 with additional licenses available from NEC. No additional hardware is required to use this embedded functionality. You can ring up to 32 extensions simultaneously and place any extension answering the line in the conference.
- Multisite Wireless Roaming with peer-to-peer CCIS. PSIII users can originate or receive calls from anywhere on a network that uses a CCIS-connected SV8300.

Additional solutions supported by the UNIVERGE SV8300 Communications Server include:

- UNIVERGE VM8000 InMail Solution
- UNIVERGE SV8000 Series Communication Analyst
- UNIVERGE SV8000 Series InRouter
- UNIVERGE UM8000-Mail Solution
- UNIVERGE UM8500 Unified Messaging
- UNIVERGE UM4730 Unified Messaging System
- UNIVERGE Attendant UA5200
- UNIVERGE Attendant UA5200 Console
- UNIVERGE OW5000 Platform

## Seamless Networking

Designed to be both versatile and scalable for your growing business needs, the SV8300 supports IP, TDM, video, wired or wireless. Its resources and features can be transparently shared between branches or remote locations by networking SV8300s or linking SV8300s with other NEC telephony devices including:

- UNIVERGE SV8100 Communications Servers
- UNIVERGE SV7000 Communications Servers
- NEAX® platforms

A geographically distributed unified system with a single image can be produced by using NEC's UNIVERGE MA4000 Management System to ensure application integration, feature transparency and survivability in the event of network failures.

NEC's UNIVERGE SV8300 Communications Server provides the scalability and flexibility to meet all of your business's communication requirements.
