

voice.

Interwest provides leading edge telephone system products and services to ensure that your voice communications are reliable, accessible, and effective. We understand that no two people – or businesses – are alike. People communicate in different ways according to their unique roles. We focus on bringing together a variety of applications to streamline communication and to improve efficiency.

## Interwest alleviates the hassle of dealing with telephone companies.

- We will provide a phone bill audit at no charge for all of our new customers, in order to examine how we can decrease your monthly telephone service expense. Then we will handle the legwork to make any necessary changes to your account.
- We provide service and support for all major telephone equipment manufacturers including: NEC, TelRad, Nortel, Panasonic, Fujitsu, Comdial, etc.
- We offer an aggressive lease program for new equipment purchases to help our customers spread the expense out over time.

Interwest offers unique converged communications solutions that bring voice and data together to help you communicate more effectively. Unified Communications has changed the way people communicate, integrating voicemail with email, and providing powerful call management applications for your office PC.

# convergence.

## **Our voice messaging products deliver advanced integration**

for the way you really work, from compact systems for the small growing business to a fully networkable voice mail powerhouse. Voice Mail and Unified Messaging products with built-in applications such as Automated Attendant and integration with email, increase productivity, efficiency, and improve the overall quality of your company's customer service.

## **Unified Communications Advantages:**

- Efficiency: Simplifies the user experience
- Access: Increases the productivity of mobile users
- Speed: Call one number and locate any user, anywhere
- Flexibility: Scalable and modular to grow with your business

Structured cabling is the medium which carries the lifeblood of your organization – information. To minimize expensive voice and data network problems, Interwest Communications follows strict installation and testing guidelines. Our installation techniques provide customers with the flexibility to install any combination of computers, network printers, phones, modems, and other analog devices at any location.

# structured cabling

## We can tackle voice and data cabling projects of any size,

including small projects like adding one or two network cable drops. All voice and data cable infrastructure installed by Interwest is installed with future-proofing in mind, and with a focus on increasing your company's ROI. We employ a highly trained staff of installation technicians, and design specialists (BICSI RCDD), to ensure a successful project from start to finish.

## Our product warranty programs ensure

that your structured cabling purchase will be a long-term and worry-free investment.

- Hubbell Premise Wiring 25-Year Mission Critical Warranty
- Leviton Lifetime Warranty

In order to be able to offer such incredible product warranties, the structured cabling must be installed following strict and specific guidelines, and testing must be done using the right equipment calibrated for the latest standards. We test (called certification) all cable installations using the latest Fluke DTX test equipment, and can provide you with printed test results for your records.
